ROLL WINDER

TECHNICAL DATA

Material: OFFSET BOB paper from 35g to 60g.

Maximum speed: 250m/min.

Finished roll:

Equipped with a 1500mm diameter unwinder with automatic paper tension control, pneumatic roll loader, and mechanical roll shifter.

Adjustable hopper for cardboard cores from 40mm to 75mm.

Automatic core feed and roll extraction.

Installed power: Approximately 12 kW.

Voltage: 380 VAC.

EEC regulations.

Designed and manufactured by Teyman Converting, S.L., in Spain.

CHARACTERISTICS

Equipped with a meter counter and a rewind diameter detection cell.

Automatic gluing and cross-cutting.

Pre-cutting. Built-in fixed service marker with two blades at 20 or 30 cm, or one blade at 40 or 60 cm.

Steel-on-steel roller embossing according to (design to be specified).

FORMAT AND DIMENSIONS

Working width: 800-1200 mm.

Outer diameter: ø80 to ø200 mm.

Rolls between 10 and 200 meters.
