BA-2700

AUTOMATIC WINDER

TECNIC DATA

Automatic gluing and cutting.

Maximum bar length: 2700 mm.

Maximum feed reel diameter: 2200 mm.

Maximum winding speed: 350 m/min.

Installed power: Approximately 15 kW.

Meter counter and rewind diameter detection cell.

Two 2200 mm diameter unwinders with tension control and hoist.

Voltage: 380 VAC.

CHARACTERISTICS

Automatic winder for tablecloth rolls. Approximate production of 80 rolls per hour. Includes end paper seal. Also suitable for working with fabrics.
